

I listen to K-Love on my local station. It helps keep me focused on being nice to people in my community. For example, this morning on my drive to work someone cut in front of me and then went very slow and I could not get around them because of on-coming traffic. Instead of getting mad, I had to smile at my own instinctive reaction, because I had K-Love on the radio and it did not make sense to me to get mad at this little thing when it was not what God would want me to do. Even though my entire day could have been set off with a bad incident, instead I had positive thoughts to start my day. If K-Love was not on my local station I would really miss the good feeling I get listening to the station every day. I truly believe K-Love is serving a very good public interest in my community and is making our little section of the world better for those who are listening. Please do not let Low Power FM (LPFM) stations to take priority over current FM translator service.
